

FEEDING DIRECTIONS

Top dress onto regular feed at the rate of 30 to 60 grams (One scoop is approximately 60 grams, 1 g = .03 oz) per sow per day starting five days prior to farrowing and until five days after farrowing or mix into the complete feed at the rate of 5 to 10 kg per tonne (1 kg = 2.205 lb, 1 tonne = 1.102 ton).

Provide an optimum supply of water at all times when feeding farrowSTART.

STORAGE

Keep bags closed. Store in cool, dry area for maximum stability. Avoid leaving bag open for extended periods of time.

TARGETED TO PROVIDE A SPECIFIC SOLUTION.**

***Meets the sow's need for additional nutrients
shortly before and after farrowing***

As pressures increase for producers to reduce or eliminate medications in their feeding programs, it is of utmost importance that our livestock be fed the safest, most natural ingredients possible.

***Specially formulated to provide
additional vitamins, minerals and
electrolytes at the crucial time of
just before and after farrowing.***

KEY INGREDIENTS

ENERGY, AMINO ACIDS AND VITAMINS

Provide the extra nutrients required to maintain and rebuild the health of the animal after a period of stress.

VITAMIN E

Vitamin E plays a major role in protecting body tissues from harmful reactions that can be caused by normal metabolic processes or environmental toxins.

The Challenge

In some situations, feed intake may be reduced shortly before and after farrowing due to the change of moving dry sows to farrowing crates and the actual act of farrowing.

If not properly managed through adequate supplementation of regular rations that in many cases are designed for higher intakes, performance and subsequent reproduction problems could occur, affecting the producer's bottom line.

The Solution

farrowSTART™ Sow Top Dress Supplement is designed for individual gilts/sows that require higher nutrient intakes to prepare them for farrowing and lactation. farrowSTART provides an available source of vitamins, minerals and electrolytes.

POTENTIAL BENEFITS

EASY TO USE

farrowSTART is a free-flowing product that is available in pails. A scoop is provided with each container that measures approximately 60 grams per scoop.

VERSATILE

farrowSTART can be topdressed or used

- in complete mash or pelleted feeds
- in vitamin/mineral premixes and supplements
- in liquid feed systems
- with other Start line products

SAFE TO USE

- farrowSTART is safe to handle.
- There is no withdrawal period.
- farrowSTART is extremely stable and heat tolerant.

ADDED SELENIUM & VITAMIN E

Helps to strengthen immune system response.
